no rush

On Sun, Aug 5, 2018 at 10:31 AM, Bryan Bishop <[REDACTED]> wrote:

Attached is the doc you requested, it's the "use of funds" spreadsheet for the designer baby and human cloning company.

This gets us out of our self-funded "garage biology" phase to the first live birth of a human designer baby, and possibly a human clone, within 5 years. Once we reach the first birth, everything changes and the world will never be the same again, much less the future of the human species. Attached doc shows ~\$1.7m/year for up to 5 years + \$1m for lab setup. (~\$9.5m to fund 5 years, \$6m for 3 years).

Next steps: I am happy to hop on another call, or I could take a trip to meet you in person? And if you have any thoughts about what I might be missing, or whether this is a reasonable estimate to get to the first live birth, then I would really appreciate any feedback you have.

I am traveling in Lithuania for Aug 7-14 and I'll probably be unreachable during that time.

Google Docs version here (same file):
